Over 1.6 million students have succeeded using this book more than any other EMT basic training text. For over thirty years, Emergency Care has provided students with clear, complete coverage of the U.S. DOT EMT basic national standard curriculum. The ninth edition provides updated content, a new interior design, and enhanced pedagogical features to keep pace with today's students' needs and advances in prehospital care. A state-of-the-art multimedia package featuring a student CD-ROM and a text-specific companion website provides students with greater coverage of chapter material.

Science Essentials, high school level, gives classroom teachers and science specialists a dynamic and progressive way to meet curriculum standards and competencies. Science Essentials are also available from Jossey-Bass Publishers at the elementary school and middle school levels. You'll find the lessons and activities at each level actively engage students in learning about the natural and technological world in which we live by encouraging them to use their senses and intuitive abilities. On the road to discovery, they were developed and tested by professional science teachers who sought to give students enjoyable learning experiences while preparing them for district and statewide proficiency exams. For easy use, the lessons and activities at the high school level are printed on a big 8 1/2 x 11 lay-flat format that folds flat for photocopying of over 107 student activity sheets and are organized into two sections: I. Biology (60 lessons) addresses the following topics: fundamental life process, single and multicellular organisms, phenotypes, DNA, RNA, genetics, ecosystems, internal environments, bacteria, and viruses. II. Chemistry (47 lessons) includes information about the periodic table of elements, properties of matter, and kinetic molecular theory. Each section offers detailed lessons with reproducible activity sheets for teaching basic concepts and skills in one main area of science at this level. Each lesson includes the basic principle underlying the lesson and accompanying student activity, the specific science competency students will demonstrate, a list of materials needed to complete the activity, an easy-to-follow illustrated procedure for presenting the lesson, and

accompanying student activity handout observations analysis describing the desired results and answers to the student activity a two page illustrated student handout with step by step directions for carrying out the activity and recording observations and conclusions the lessons in each section are followed by sample test items focusing on the concepts and skills emphasized in that section these will help students prepare for the types of questions they will be asked in actual test situations and are followed by answer keys all three grade level volumes elementary middle school and high school give you stimulating and effective ways to help students master basic science content and prepare to demonstrate their knowledge at the particular level
