welcome to flask s documentation flask is a lightweight wsgi web application framework it is designed to make getting started quick and easy with the ability to scale up to complex applications

flask uses a concept of blueprints for making application components and supporting common patterns within an application or across applications blueprints can greatly simplify how large applications

application structure and lifecycle flask makes it pretty easy to write a web application but there are quite a few different parts to an application and to each request it handles knowing what happens

patterns for flask certain features and interactions are common enough that you will find them in most web applications for example many applications use a relational database and user authentication

then follow the installation instructions to set up a python virtual environment and install flask for your project the tutorial will assume you re working from the flask tutorial directory from now on the file

quickstart eager to get started this page gives a good introduction to flask follow installation to set up a project and install flask first a minimal application a minimal flask application looks

design decisions in flask if you are curious why flask does certain things the way it does and not differently this section is for

you this should give you an idea about some of the design decisions

api this part of the documentation covers all the interfaces of flask for parts where flask depends on external libraries we document the most important right here and provide links to the canonical

deploying to production after developing your application you ll want to make it available publicly to other users when you re developing locally you re probably using the built in development server

installation python version we recommend using the latest version of python flask supports python 3 9 and newer dependencies these distributions will be installed automatically when installing
