dale university of texas austin teaches students how to program with java by actively engaging them in the learning process providing 14 chapters of lab activities that focus on the topics presented in the text programming and problem solving with java in each lesson students will gain program

spending time actively programming on a computer is the most important part of a programming class dale originally developed lab manuals as part of self paced learning packages this manual is an ideal companion to dale weems headington introduction to java and software design it maps to the chapter order of this textbook it focuses on teaching syntax rules for java functions and contains three types of activities prelab inlab and postlab all designed within a closed laboratory setting java was not designed with the beginning student in mind therefore closed laboratory activities are essential for students to understand the syntax and semantics of each construct as they progress a diskette with programs program shells and data files accompanies the manual

visual basic net a laboratory course teaches the reader how to program in visual basic from an object oriented viewpoint which is important because of the object oriented flavor of vb net the emphasis of this book is not on the fancy users interface tricks you can perform with vb net but on the fundamentals of writing

correct and efficient vb programs the book provides a number of example programs that illustrate the concepts developed in the text and the exercises at the end of each chapter help to reinforce the expository material from the chapter visual basic is arguably the most popular computer programming language for application development in the united states and around the world today visual basic is also an excellent language to teach as a first computer language because of its easy to learn syntax and flexibility this book treats visual basic as a serious programming language and not as just another windows application one concern that is frequently voiced when discussing the differences between visual basic and c is the level of object oriented programming supported by visual basic with the upcoming release of vb net the language will support all the major features of object oriented programming encapsulation inheritance and polymorphism

a lab manual disk package for a course in programming in c ideally suited to a closed laboratory environment each chapter contains three types of activities involving reading review assignments simple paper and pencil exercises lab lessons broken down into concept exercises and outside progra
